

# Kimberly-Clark Professional Introduces Jackson Safety Brand Realtree Camouflage Welding Helmet

ROSWELL, Ga., Aug. 20, 2012 /PRNewswire/ -- For the welder who is also an outdoorsman, Kimberly-Clark Professional introduces an ultra-lightweight helmet with a camouflage design from Realtree, a leader in outdoor camouflage gear.

(Logo: <http://photos.prnewswire.com/prnh/20120320/DA66105LOGO-b>)

**Jackson Safety Brand Realtree Camouflage Welding Helmet** is rugged, yet weighs only six ounces. It features a Hydraflex Shell that helps reduce neck tension by providing maximum flexibility and durability. It's also protective and easy to wear.

"Realtree is one of the most recognizable brands within the outdoor market," said Kristy Giebe, Product Manager, Welding and Head Protection for Kimberly-Clark Professional. "Its camouflage patterns are extremely popular with North American sportsmen, making this helmet a natural choice for professional welders with outdoor interests."

The new Jackson Safety welding helmet is available in passive and Auto-Darkening Filter (ADF) lens options. Both provide excellent eye protection.

ADF helmets can greatly enhance productivity as well as comfort for end-users, according to a recent study. For instance, helmets with ADF lenses eliminate the need to "lift and nod" the helmet. Welders who use passive helmets spend three percent of the day "lifting and nodding." Use of an ADF versus a passive helmet can increase productivity by 12 minutes per day, per welder because of the time savings generated by not having to "lift and nod." [1]

The Jackson Safety brand Realtree Camouflage welding helmet is available in two ADF versions.

The WH60 Truesight Digital Auto-Darkening Filter, which meets ANSI Z87.1-2010 standards, is CSA Z94.3 compliant and features:

- An intuitive, digital control panel
- Variable shades 5-13, sensitivity and delay adjustments
- Large, individual buttons with LED indicators for Weld, Torch and Grind modes
- Four independent sensors positioned to reduce the possibility of blockage during welds
- An amber band pass to provide enhanced clarity of the weld puddle
- A built-in magnification lens

The WH40 Professional Variable Auto-Darkening Filter, which meets ANSI Z87.1 standards, is CSA compliant and offers:

- Variable shade 9-12, sensitivity and delay adjustments

- Battery power and a solar assist, with two independent sensors
- A technology that allows the unit to detect welds less than five amps
- A built-in magnification lens holder

Both ADF filters are powered by two easy-to-replace AAA batteries. The WH60 Truesight ADF Filter comes with a low-battery indicator.
